User Table:

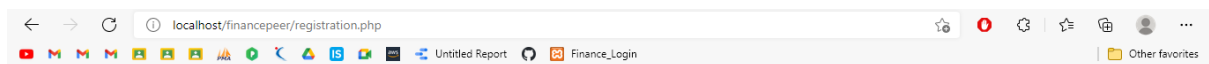

Student_data table for storing JSON file's data:

The screenshot shows the phpMyAdmin interface with the 'student_data' table structure displayed. The table has five columns: 'id' (int(10), AUTO_INCREMENT), 's_id' (varchar(10)), 's_name' (varchar(25)), 's_gender' (varchar(8)), and 's_age' (int(5)). All columns are of type utf8mb4_general_ci and are not nullable.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(10)			No	None		AUTO_INCREMENT	Change Drop More
2	s_id	varchar(10)	utf8mb4_general_ci		No	None			Change Drop More
3	s_name	varchar(25)	utf8mb4_general_ci		No	None			Change Drop More
4	s_gender	varchar(8)	utf8mb4_general_ci		No	None			Change Drop More
5	s_age	int(5)			No	None			Change Drop More

In database:

The screenshot shows the phpMyAdmin interface. The left sidebar displays the database structure with 'financepeer' selected. The main panel shows the 'user' table structure. The table has four columns: 'id', 'name', 'username', and 'password'. A single row is visible with the following data:

id	name	username	password
10	suresh	suresh	\$2y\$10\$4VIR5NHsbZ8kTbbhP:CKxua78iCEiyuAPn9rtvtKOZB...

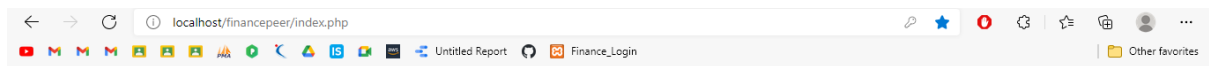

If try to register with same username:

The screenshot shows the registration form with the title 'Registration'. A message 'Username already present' is displayed above the 'Username' field. A link 'Login?' is visible next to the message. The form includes fields for 'Name', 'Username', and 'Password'. The 'Password' field has a placeholder text 'Please fill out this field.' and a 'Submit' button below it.

Login:

The screenshot shows the login form with the title 'Login'. A link 'Register' is visible next to the title. The form includes fields for 'Username' and 'Password', and a 'Submit' button below them.
